CAUTION:

Before starting, turn off power at main circuit panel.

ATTENTION:

coupez l'alimentation avant de procéder à l'installation.

1. Remove the canopy side screws "G" and washers "F" on the canopy "H", and take out mounting plate "B".
2. Secure the mounting plate "B" with a screw driver and secure the screws "D" and washers "C" by inserting the screws and washers through the holes of mounting plate "B".
3. Gently pull wires down from the wall junction box and allow it to hang.
4. The wall lamp has two wires, the positive (+) wire is the wire with "letter" on it, the other wire is negative (-).
5. Connect the wires as detailed in the wiring diagram. Attach the wall lamp switch wire (+) to wall junction box (+) wire, and properly attach them together with wire cap "E", and wrap the wire cap connection with electrical tape.
6. Attach the neutral wire (-) of the wall lamp to the neutral wire of the wall junction box, and properly attach them together with wire cap "E", and wrap the wire cap connection with electrical tape. Attach the ground wire of the wall lamp to the ground wire of the wall junction box. and properly attach them together with wire cap "E", and wrap the wire cap connection with electrical tape.
7. Do not reverse the hot and neutral connections or safety will be compromised.
8. Push the canopy "H" up over the mounting plate "B" until it is aligned with the wall. Align holes in the canopy "H" with holes in the mounting plate "B" and secure with two screws "G" and two washers "F".
9. Secure wall lamp pole to the wall by using screw driver to fix screw on "L".
10. Place lamp shade "I" on the lamp holder and secure it with lamp holder ring "J".
12. Restore power to the junction box and turn on switch test that wall lamp light works.
